## APPLICATIONS

Knowledge is profitable and knowing your labor costs on payroll as well as each aspect of a job makes the difference between a profitable job or a loss.

The T-4U can be used by firms of all sizes to record time data for payroll purposes. You will generate an undisputable legible record that will facilitate time computation, reduce tardiness and provide the required records for Wage and Hour regulations.

Additional applications include; control of paperwork flow through your office, job costing and validating documents. You can identify when a document was received, faxed, shipped, etc. The new Widmer T-4U is a very, very versatile machine.
